- **Exchange/repair** is available for discontinued sizes (keep your housings): Consult Traverse City factory.
- Repaired pumps are **fully tested** in Traverse City, Michigan. No testing before disassembly and inspection.
- **Repair Delivery time is 4 to 8 weeks on standard rotation**, CCW rotation can take up to twice as long.
- **Delivery for D-15030 basic clockwise exchange/repair: → one week.**

Pricing: Pricing is Effective as of January, 2017. This Standard document/annex can be amended with a 15 day notice at any time. Oilgear's standard Terms and Conditions (July 2016) apply. Oilgear quotes are valid for 60 days.

- 1) **New D pump units** are quoted on demand – Consult TVC factory.

- 2) **Exchange/Repair D-15030 basic unit clockwise rotation (no control): \$38,500 / 1 week.**

- 3) **“Not to exceed” repair pricing:**
 - The pumps (with or without controls) are inspected when received in our Traverse City factory.
 - The repair quotation is sent (10 days max after receipt of the pump) after disassembly and inspection with full report for purchase order placement.
 - The indicated lead time is from receipt of repair purchase order to shipment from Traverse City.
 - If a purchase order for repair is not received within 3 months, inspection/storage fees are charged.
 - Quoted lead times are contingent on receipt of payments according to Oilgear's payment terms.
 - Distribution discount does not apply on “not to exceed” indicated pricing.

D-150 HP basic pump: \$39,900 (not to exceed) / 4 to 5 weeks.

D-15030 with STD controls (M or V): \$52,500 (not to exceed) / 5 to 6 weeks.

DN with STD controls: \$65,000 / 6 to 8 weeks.

- Oilgear agrees to, and will remain within, indicated “not to exceed” prices even if inspection indicates that additional repair costs are required. Pricing for “not to exceed” only applies to pumps which are **not internally completely destroyed** when received and the main housing can be re-used. Pictures in the inspection repair report will be used to document the pump condition..

End of document. January, 2017
